Subject: Air Quality Comments Regarding the Corrine Quarry
Attachments: 0004.pdf

The attached comments from the Division of Air Quality were received by the Division about a month ago. Unfortunately, they had been filed with the wrong project.

I am forwarding these comments for your record, and ask that you make sure your Air Quality permit for the Corrine Quarry addresses the concerns outlined. Assuming they do, there is no further action needed on your part. If your Air Quality permit needs to be revised, please provide the Division with a copy of the revised Permit.

Thank you for your attention to this matter.
